*"cordloop has an
attractive design that
merges form and function
into a compact and versatile
cable organizer"*

most cable types

*"a state of the art general
purpose cable organizer for
electrical appliance cables"*

Cordloop is an innovative, cool looking and handy cable organizer that will help you manage your cables at home or at work. Use Cordloop to wind up excessive cables for your TV, stereo, PC and other electric equipment, and organize your hidden and store away cables.

- **attractive design**
that merges form and function into a compact and versatile cable drum that is good to hold and attractive to look at.
- **a modern design**
gives a complementary expression to modern appliances.
- **user friendly**
makes it simple to manage all sorts of cables.
- **integrated lid**
will enclose the winded cable on to the drum when closed.
- **drum handle**
holding the drum by the handle makes winding and unwinding of cable easy.
- **gentle cable locks**
lid and cable locks are designed to prevent damaging pressure to the cable isolation.
- **large bending radius**
gentle to cables with limited bending radius. Prevent damaging bending of cable.
- **cooling vents**
will prevent heat build up from power cords.
- **color**
can be made in a variety of transparent and opaque colors.
- **recyclable**
made of the recyclable material ABS.

cordloop®

design

Technically Cordloop can be classified as a cable spooler, cable coiler, cable reel or cable drum. We say Cordloop is a cable organizer with an integrated lid and a handle.

form and function

Cordloop is designed to combine an attractive form with multiple functionality into the universal torus form, making management of cables easy and effortless.

integrated lid

The Cordloop is composed of a cable drum (blue) and an integrated lid (silver grey).

drum handle

When opening the lid, access to the cable drum is given. The lid integrates beautifully with the drum, and transforms to a handle when opened, making it easy to wind cable on or off the drum.

dual cable locks

Closing the lid will keep the winded cable in place on the drum. The cable drum is equipped with dual cable locks that add an additional locking feature to be used when needed.
